### NEW YEAR'S IN AFRICA.

Savage nations have many ideas in common with their more civilized brethren. Dr. Junkin says that the African New Year wish is "Kuilo same took," meaning in Arabic jargon, "The whole year good." In answer to this salutation the person saluted is expected to return some small gift. The doctor got rid of many of his visitors by taking out of their mouths, before they could utter it, their own greeting. But not all of them.

Later in the evening I experienced a

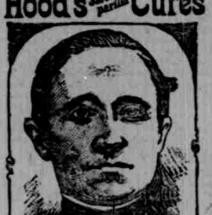

But not all of them.

Later in the evening I experienced a masterpiece of Arab impudence which is worthy of record. I had long since withdrawn to my hut and taken my simple evening meal, when a large Arabian lantern appeared before my door, followed by several servants with a tremendous "zenia," which is a round Arabian waiter that serves as a dinner

At the same time a man came on the scene whom I had seen only once be-fore under very questionable circum-stances. He was an Arab clerk in the divan, a Dongolan, and therefore dis-liked, and probably altogether a "ne'er-do-well." He wished me his "Kullo sume taib," set before me, to my aston-lahment, an undesired repast, and at once vanished with his confederates. According to Arab customs there was nothing peculiar in this, although, as he had no connection with me whatever, this offering from a subordinate was strange enough. Of course there was a reason for all this; it was another instance of "the sausage which was thrown to the ham." The man wanted my intervention in a difficulty he had got into.

## CARELESSNESS OF THE AMERICAN PEOPLE!

A Trait That Is Sending Thousands of Them to Premature

Thousands of people right in this city are hurrying themselves to the ceme-teries through carelessness. They think they have simply a bad cold in the head or a sore fhroat when in reality they are walking about with estarrh—rise rouse, nunnan or constarrios. If they would but stop to think of the years of misery they might save themselves they would strangle the disease in its infancy. Delay is dangerous; besides it requires a hard fight to gradients the disease from the sys-tem whem it is allowed to run. Humanity is alike the world over—people keep putting off seeing what is the matter with them, and when they might be cured for a few dollars they wait until the disease has passed beyond the skill of the physician and they fill the grave they help to dig.
